JIM HARRIS
SITE MANAGER
SOMERS TIE PLANT, SOMERS, MT.
HELENA, MT.

Dear Jim,

An update to the Somers Citizens Committee on Tie Plant cleanup is requested. It is very obvious the excavation phase has started.

Areas of interest to discuss are:

The start of a new phase of site clean up.

Presentation of design for the Land Farm.

Progress on design for landscaping the Land Farm Site.

Update on quantity, type and location of recent excavation.

Update on volume, type and areas of contaminated soil to be excavated.

Compliance to agreed understandings for reduction of impact to the community of site activities.

Request compliance to EPA Regulations when site contractors utilize Somers system water for filling water tanks.

Request discussion to improve contractor performance on dust abatement. Dust control during the recent excavation was less than ideal.

An update to the mailing list for our group:

DELETE

Marie Herron, who past away in July, 1992.

Sincerely,

Morey D. Grove
